

## **T-105 TACH ADAPTER INSTALLATION INSTRUCTIONS**

### Description

The T-105 Tach Adapter provides corrected tachometer reading when the ignition system has been converted to single-fire operation. It has been designed specifically for the latest generation of dwell controlled ignitions, but is also compatible with earlier generation systems such as the Dyna-S.

### Installation

1. Connect a GRAY wire to each of the coil (-) terminals.
2. Connector the BLACK wire to ground.
3. Connect the PINK wire to the tach input.

Note: wires are supplied with extra length and may be trimmed for best fit.
